MCL = Maximum Contaminant Level referenced from New York State Subpart 5-1 of the Public Drinking Water Standards and/or National Primary/Secondary Drinking Water Standards.

Comments:

Not all test results are within acceptable limits, please consult chart. If you have any questions, please call the laboratory.

**Revisions to Public Health Law (Section 1110) which governs school potable water testing and standards were finalized on March 4, 2022. The revised law took effect on December 22, 2022. The key revisions to the law which will require changes to Subpart 67-4 include:*

- 1. The revised action level of lead in drinking water is 5 parts per billion (ppb, µg/l), reduced from 15 ppb (µg/l).*
- 2. School buildings deemed "lead-free" are no longer exempt from testing requirements per Subpart 67-4.*

Qualifiers Key:

Qualifiers:	C+: CCV above acceptable limits
ND: Not Detected at the reporting limit	S: LCS Spike recovery is below acceptable Limits
J: Analyte detected below quantitation limit	S+: LCS Spike recovery is above acceptable Limits
B: Analyte detected in Blank	Z: Duplication outside acceptable limits
X: Exceeds maximum contamination limit	T: Tentatively Identified Compound – Estimated
H: Hold time exceeded	E Above quantitation range - Estimated
N: Matrix Spike below acceptable limits	
N+: Matrix Spike above acceptable limits	
S: LCS Spike recovery outside acceptable limits	
C: CCV below acceptable limits	

Legend:

< = Less than
> = Greater than
≈ = Approximately
NP = Not Provided
mg/l = milligrams per liter = ppm
ppm = parts per million
µg/l = micrograms per liter = ppb
ppb = parts per billion
gpg = grains per gallon
MCL = Maximum Contaminant Level
SM = Standard Methods For the Examination of Water and Wastewater
